GREEN CAMPUS INITIATIVES INCLUDE

- Restricted entry of automobiles
- Ban on use of plastic
- Landscaping with trees and plants
- Water resources & Rainwater harvesting
- Conservation of natural resources
- Energy consumption and renewable energy resource

St. Johns college of pharmaceutical sciences has always taken a green agenda for developing a green campus. It has shown remarkable awareness in maintaining an eco-friendly campus. On visiting the campus, one can experience the aesthetic and elegant buildings, spacious sports grounds and lush green environment conducive for teaching-learning process.

2.BAN ON USE OF PLASTIC:

The institution banned single usage of plastic. In the canteen steel glasses and plates, spoons are in use to be eco friendly environment. The students and staff are informed to use copper water bottles instead of plastic bottles. Students and faculty explained the ill effects of plastics and recommended not to use plastics. Instead of plastics, reusable bags can be used which saves the environment and animals.

4. WATER RESOURCES & RAINWATER HARVESTING:

As the college is located in a hot climatic zone, the college realises the importance of conservation and the best utilisation of water resources. The college maintains and generates water resources. The college has a bore well to meet the general need of the institution. The water from the roof tops along with the rain water is collected through a well-connected pipe work delivery system. This arrangement is helpful in collecting water, which is then collected in to pits, specially constructed for this purpose. The rainwater stored in the pits is used for the maintenance of the green cover on the campus. In the hot summer season, when water scarcity is more, the surrounding bore wells get recharged and the ground water level increases.
